ALTERNA

1. **PLYBOO®** bamboo plywood is the ultimate cabinet material for both sustainability and style. Bamboo plywood is rapidly renewable and will not "off-gas" toxic chemicals that pollute your indoor air. Choose from a variety of stunning options, including amber edge grain as pictured here. www.plyboo.com

2. **RICHLITE** presents 100% post-consumer recycled paper composite panels and slabs for kitchen and bath surfaces. This innovative material is impervious to water and as hard as stone, thereby making it ideal for countertops and wall paneling, including in the shower or even outdoors. Richlite's striking Black Diamond color option is featured here. www.richlite.com

3. **CAROMA**, the pioneer of the dual flush toilet, introduces the Invisi™ Series II Toilet, which epitomizes the phrase "less is more." With the tank and flush-valve mechanism hidden smartly hidden inside the wall, this WaterSense® labeled toilet saves water, money and space. www.caromausa.com

4. **FLUID®** faucets combine high efficiency and contemporary design for the kitchen and bath. All fluid™ faucets are WaterSense® labeled, meticulously crafted from solid, lead-free brass and built to last. Select from an array of unique designs in polished chrome or brushed nickel with matching shower components and accessories. www.fluidfaucets.com

All featured products are available from ALTERNA, the "go to" source for sustainable fixtures and finishes for the kitchen and bath. With a new showroom just minutes from Miami International Airport, Alterna is proud to be the green design hub for the Americas. Miami, 1-866-683-9450
